PIEZOELECTRIC INKJET INKS

NAME	DESCRIPTION	COLORANT TYPE	SHELF LIFE	BOTTLED	PART NO.
UV / UV-LED curable inks					
RadiJET®7620K	Black UV LED curable ink: Designed for single pass industrial coding & marking applications, excellent print quality and adhesion on non-porous substrates.	Black pigment	6 mos.	1 L	7620K01P
RadiJET®7620R	Red UV LED curable ink: Fast curing speed, good adhesion and print quality on semi-porous and non-porous substrates.	Red pigment	6 mos.	1 L	7620R01P
RadiJET®7610K	Black UV LED curable ink: Fast curing speed and excellent adhesion on non-porous substrates.	Black pigment	6 mos.	1 L	7610K01P
RadiJET®7602C	8 colors ink set for wide format commercial printing applications: Vivid color, wide color gamut, excellent light fastness and good adhesion on semi-porous and non-porous substrates. The inks are compatible with Konica Minolta and Ricoh printheads.	Cyan pigment	6 mos.	1 L	7602C01P
RadiJET®7602M		Magenta pigment	6 mos.	1 L	7602M01P
RadiJET®7602Y		Yellow pigment	6 mos.	1 L	7602Y01P
RadiJET®7602K		Black pigment	6 mos.	1 L	7602K01P
RadiJET®7602LC		Cyan pigment	6 mos.	1 L	7602C11P
RadiJET®7602LM		Magenta pigment	6 mos.	1 L	7602M11P
RadiJET®7602W		White pigment	6 mos.	1 L	7602W01P
RadiJET®7602V		Colorless	6 mos.	1 L	7602V01P
RadiJET®7600F		Flushing solution for UV / UV LED curable inks.	Colorless	12 mos.	1 L
Aqueous inks					
HydraJET®8053K	Black dye aqueous ink: High optical density, good light fastness and water fastness on porous and semi-porous substrates.	Black dye	12 mos.	1 L	8053K01P
HydraJET®8052K	Black pigment aqueous ink: High optical density, excellent light fastness and water fastness on porous substrates.	Black pigment	12 mos.	1 L	8052K01P
HydraJET®8053R	Red dye aqueous ink: High optical density and good print quality on porous and semi-porous substrates.	Red dye	12 mos.	1 L	8053R01P
HydraJET®8050F	Flushing solution for aqueous inks.	Colorless	12 mos.	1 L	8050F01P
