PIEZOELECTRIC INKJET INKS

NAME	INK TYPE	DESCRIPTION	SHELF LIFE	BOTTLED	PART NUMBER
UV / UV-LED curable inks					
 RadiJET® 7620K	Black pigment UV LED curable	Designed for single pass industrial coding & marking applications, excellent print quality and adhesion on semi-porous and non-porous substrates.	6 mos.	1 L	7620K01P
 RadiJET® 7616K	Black pigment UV LED curable	Designed for breakable sticker coding & marking; fast curing speed, excellent sharpness and adhesion.	6 mos.	1 L	7616K01P
 RadiJET® 7610K	Black pigment UV LED curable	General purposes, fast curing speed and excellent adhesion on non-porous substrates.	6 mos.	1 L	7610K01P
 RadiJET® 7620R	Red pigment UV LED curable	Fast curing speed, excellent adhesion and print quality on semi-porous and non-porous substrates.	6 mos.	1 L	7620R01P
 RadiJET® 7620W	White pigment UV LED curable	Fast curing speed, high optical density and sharpness on dark substrates; excellent print quality and adhesion on non-porous substrates.	6 mos.	1 L	7620W01P
 RadiJET® 7620V	UV LED curable varnish	Fast curing speed, high transparency, excellent print quality and adhesion on non-porous substrates.	6 mos.	1 L	7620V01P
 RadiJET® 7602C	Cyan pigment UV curable	8 colors ink set for wide format commercial printing applications: Vivid color, wide color gamut, excellent fade resistance and good adhesion on semi-porous and non-porous substrates. The inks are compatible with Konica Minolta and Ricoh printheads.	6 mos.	1 L	7602C01P
 RadiJET® 7602M	Magenta pigment UV curable		6 mos.	1 L	7602M01P
 RadiJET® 7602Y	Yellow pigment UV curable		6 mos.	1 L	7602Y01P
 RadiJET® 7602K	Black pigment UV curable		6 mos.	1 L	7602K01P
 RadiJET® 7602LC	Cyan pigment UV curable		6 mos.	1 L	7602C11P
 RadiJET® 7602LM	Magenta pigment UV curable		6 mos.	1 L	7602M11P
 RadiJET® 7602W	White pigment UV curable		6 mos.	1 L	7602W01P
 RadiJET® 7602V	UV curable varnish		6 mos.	1 L	7602V01P
 RadiJET® 7600F	Flushing solution	Flushing solution for UV / UV LED curable inks.	12 mos.	1 L	7600F01P
Aqueous inks					
 HydraJET® 8053K	Black dye aqueous	High optical density, good fade resistance and water resistance on porous and semi-porous substrates.	12 mos.	1 L	8053K01P
 HydraJET® 8052K	Black pigment aqueous	High optical density, excellent fade resistance and water resistance on porous substrates.	12 mos.	1 L	8052K01P
 HydraJET® 8053R	Red dye aqueous	High optical density and good print quality on porous and semi-porous substrates.	12 mos.	1 L	8053R01P
 HydraJET® 8050F	Flushing solution	Flushing solution for aqueous inks.	12 mos.	1 L	8050F01P
Solvent inks					
 SoluJET® 7710K	Black dye mild solvent	Long decap time, high optical density, print quality, good fade resistance and water resistance on porous and semi-porous substrates.	6 mos.	1 L	7710K01P
 SoluJET® 7710R	Red dye mild solvent	Long decap time, good print quality, good fade resistance and water resistance on porous and semi-porous substrates.	6 mos.	1 L	7710R01P
 SoluJET® 7700F	Flushing solution	Flushing solution for mild solvent inks.	12 mos.	1 L	7700F01P
